

Create a Cognos analytics Dashboard

Troubleshooting:

- The Cognos dashboard feature in IBM Water Operations for Waternamics does not support globalization. The dashboard displays the Cognos report or dashboard in its original language regardless of the locale that is selected in your user profile.

Resolving the problem:

- To resolve the problem, your administrator can create the dashboard or report in the required locale in IBM Cognos Analytics before configuring the Cognos dashboard in IBM Water Operations for Waternamics.
- For more information about configuring a Cognos dashboard in IBM Water Operations for Waternamics

Procedure:

- On the home page, click the New icon at the bottom of the window.
